

# CSS "RESPONSIVE" & MEDIA QUERIES

NOTE:

Bellow values are just examples. You should ALWAYS create breakpoints based on your layout!

---

## "DESKTOP FIRST" APPROACH

Default width: `>= 1280px`

1<sup>st</sup> breakpoint: `@media (max-width: 1024px)`

2<sup>nd</sup> breakpoint: `@media (max-width: 768px)`

3<sup>rd</sup> breakpoint: `@media (max-width: 480px)`

## "MOBILE FIRST" APPROACH

Default width: `< 480px`

1<sup>st</sup> breakpoint: `@media (min-width: 480px)`

2<sup>nd</sup> breakpoint: `@media (min-width: 768px)`

3<sup>rd</sup> breakpoint: `@media (min-width: 1024px)`

---

## BOOTSTRAP APPROACH (Mobile first)

Default width: `< 576px`

1<sup>st</sup> breakpoint: `@media (min-width: 576px)`

2<sup>nd</sup> breakpoint: `@media (min-width: 768px)`

3<sup>rd</sup> breakpoint: `@media (min-width: 992px)`

4<sup>th</sup> breakpoint: `@media (min-width: 1200px)`
